Experience

<u>Intesa Sanpaolo Bank Albania</u>   July 2023-August 2023

-Full-Time internship

-Worked in the Development Office at Intesa Sanpaolo Bank as a full time ICT specialist intern, where I worked on furthering my skills, updating the existing database system and dealing with IT problems on all Intesa Sanpaolo Bank branches in Albania.

-During this internship, I have used and improved my skills in Java, Java Spring Boot, Database management systems and Data warehousing.

<u>BALFIN Group</u>   August 2023-September 2023

-Full time internship

-Worked on various projects and tasks assigned to me, mostly working with python.

-During my internship at Balfin, I worked as a Software Developer, gaining hands-on experience across various aspects of software development. I was involved in backend development with Python and Flask, where I built and optimized APIs, managed databases, and improved system efficiency.

I also contributed to debugging and conflict resolution, identifying and fixing issues in existing applications to ensure smooth functionality. Additionally, I worked on database management, handling queries, optimizing data storage, and ensuring system integrity.

<u>FREELANCING</u>   April 2023-Present

-I have been working as a freelance software developer and Business Central Developer since April 2024. During this time, I have worked on various Full-Stack and Front-End projects, working on delivering websites for small and medium businesses. I have deepened my knowledge in the MERN stack during this time, getting valuable experience as a full-stack software developer.

-As a Business Central Developer, I have worked with companies across various industries, helping them streamline operations, migrate from NAV to Business Central, and develop scalable extensions.

My expertise includes AL development, API integrations (REST, JSON, OAuth2), automated testing, and SaaS migrations, helping businesses get clean, maintainable and efficient solutions.

Freelance Business Central Developer & Software Engineer

Education

<u>Epoka University</u>   Oct 2021-July 2024

- Bachelor's In Software Engineering

- I have finished my Bachelor's studies at Epoka University with a half-ride scholarship. At the end of my studies my GPA was **3.04** placing me on the honor list of my university. During my time at the university, I have gotten amazing experiences on the basics of programming, software development and team-working. Parallel to my studies I have been an active member of the *Programmers Club* as well as the *Google Developer Student Club*.

I currently possess a high level of understanding over C, Java, JavaScript, HTML,Python,React,Node.js,MySql,MongoDB etc.
-Certificate for helping in creating the Database Management System of Epoka University.

Ismail Qemali High School   Oct 2018- June 2021
-High School Student
-During my time in High School, I was an excellent student, having gotten a GPA of 9.97. I was also very involved in a lot of extracurricular activities such as sports tournaments, olympiads for Physics and Mathematics, where I managed to go to the final rounds for both twice. Furthermore, I was part of the senate group of the school for 3 years, helping in creating a different number of activities. At the end of my studies I was granted a "Diploma of Excellence" from the school.

CASA Bremen Sprachschule   July 2022-October 2022
-I attended CASA Bremen Sprachschule during my summer break in Bremen,Germany. I completed the A2 level with excellent marks and 100/100 on my final test.
